github.com/arthurleywin000 — linkedin.com/in/revanth-palukuri

Objective

Computer Science undergraduate with strong foundations in **Data Structures and Algorithms, Java, and Web development**. Experienced in building scalable backend systems and RESTful services. Passionate about solving real-world problems, writing efficient code, and contributing to enterprise-grade customer experience platforms.

EDUCATION

Gandhi Institute of Technology and Management, Bengaluru B.Tech – Computer Science Engineering — CGPA: 8.95	2027
Gauthami Junior College Intermediate (Class XII) — 92%	2023
Sanghamitra High School Class X — CGPA: 9.8	2021

Experience

Java Full Stack Development Virtual Internship	2026
- Developed RESTful backend services using Spring Boot and JDBC, improving modularity and scalability - Designed and optimized PostgreSQL queries, reducing query execution time - Integrated frontend with backend APIs ensuring smooth data flow - Used Git for version control and followed clean, modular coding practices	

PROJECTS

Path Optimizer using A* Algorithm	GitHub
- Implemented A* search algorithm to compute shortest paths in weighted graphs and developed a dynamic full-stack web application - Applied heuristic optimization techniques to improve performance efficiency - Strengthened understanding of graph algorithms, time complexity, and DSA concepts - Designed the application using Spring Boot, React, and SQL	
Product Management System	GitHub
- Built backend using Spring Boot, RESTful APIs, MVC architecture, and PostgreSQL for managing product data - Designed structured APIs and implemented CRUD operations - Optimized database queries to handle large datasets efficiently	
ToDo Manager Web Application	GitHub
- Developed full-stack application using JSP, Servlets, and JDBC - Implemented efficient backend logic for task management workflows - Demonstrated end-to-end integration of frontend and backend systems	

Technical Skills

- Languages:** Java, C, Basic Python
- Core Concepts:** Data Structures and Algorithms, OOP, Problem Solving
- Backend:** Spring Boot, Java Servlets, JDBC, REST APIs
- Frontend:** HTML, CSS, JavaScript, React
- Databases:** MySQL, PostgreSQL
- Tools:** Git, GitHub
